

**ADDED VALUE SOLUTIONS FOR : AIRLINES, AIRCRAFT MANUFACTURERS & MRO**

**APPROVALS** ■ EASA PART 145 ■ EASA PART 21G ■ EASA PART 21J DDA ■ FAA, CAAC RECOGNITION  
■ GCAA DDA ■ ISO 9001 ■ EN 9100 ■ AMS AIRBUS ■ D6 BOEING ■ NTO PAINTING DEM

Airlines have to integrate solutions to fight against insects in order to prevent from pandemic risk (insects as vectors) and commercial issue with passengers (insects impact on brand image). As per World Health Organization Mosquito are insects considered as vectors. Main insect commercial issues are related to cockroaches.

In parallel, Airlines have also to integrate solutions to fight against rats, as critical animal for safety and navigability of planes. Aircraft Maintenance Manual ask for immediate action in case rat is suspected to be inside the plane or confirmed.

UUDS and DEALEY developed an unique fumigation solution: efficient with commitment on result whatever location of insect or rats (inside foam, behind panel, etc.), fast with a few hours ground time, compliant with navigability requirements and any airport expectations.

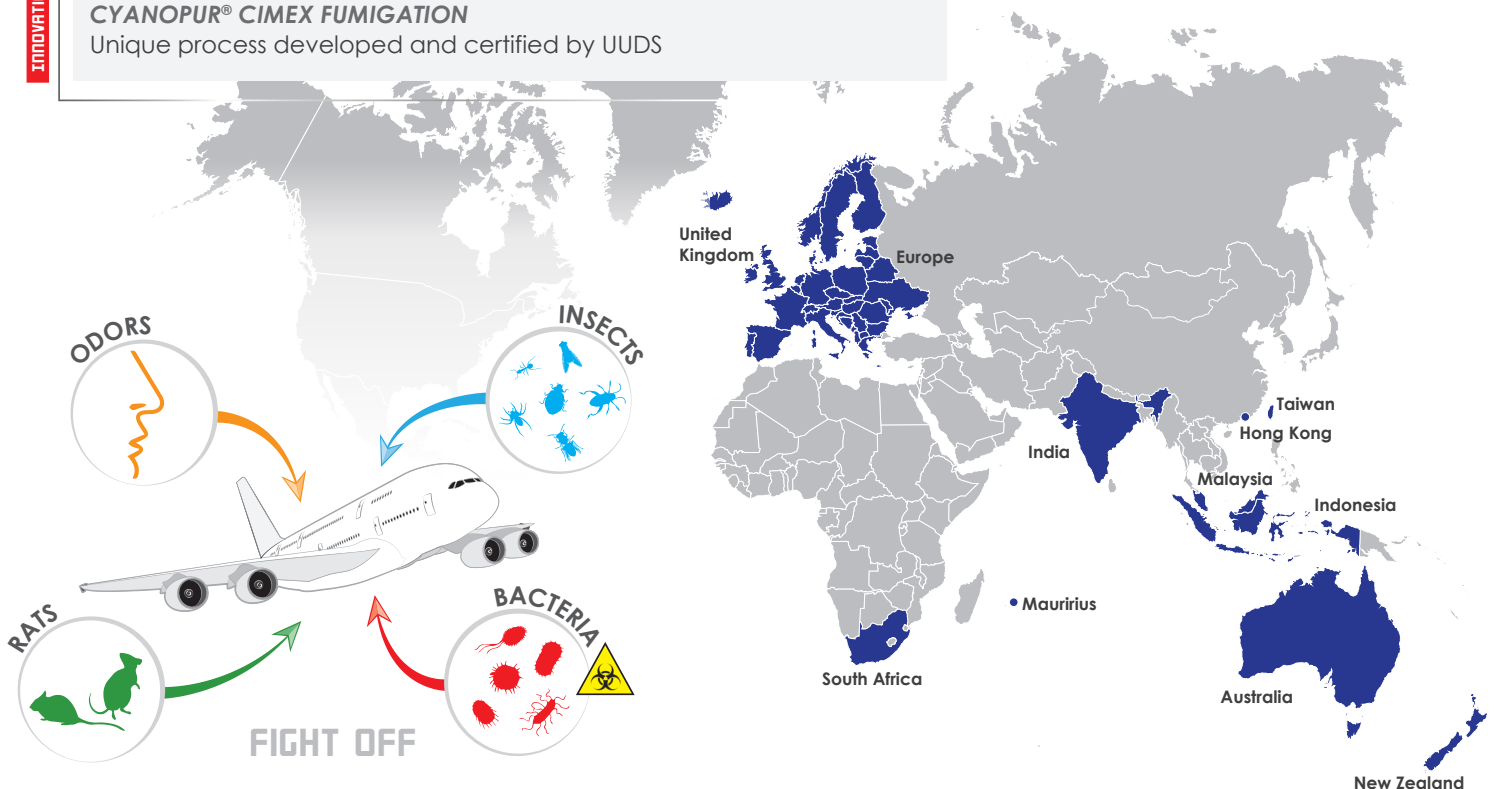

Both innovative solutions allow **TCO control**, with **full efficiency**, **NO RISKS**, and **Passengers satisfaction**. It make them unique with many benefits compared to conventional methods.

**LIVING SPECIES EXTERMINATION BY FUMIGATION**

- Capture or destruction of harmful animals (Insects, Reptiles, Spiders, Rodents).

**INNOVATION**  
**CYANOPUR® CIMEX FUMIGATION**  
Unique process developed and certified by UUDS

## PEST CONTROL / DISINSECTION

- Residual destruction by Micronisation® (cockroaches, mosquitoes, fleas, flies)

INNOVATION

### COLD MICRONISATION®

By mechanical fragmentation allowing an homogeneous and optimum diffusion of the product.

## DISINFECTION AIR AND CONTACT TREATMENTS

- Antiviral treatments and antibacteriological treatments

INNOVATION

### COLD MICRONISATION®

By mechanical fragmentation allowing an homogeneous and optimum diffusion of the product.

## DISINFECTION OF WATER DRINKING SYSTEMS

- Maintenance of the systems according to the hygiene «WHO» standards, and AMM.

## AIRLINES IMPACT

- Navigability
- Passengers, and crew sanitary risks
- Aircraft grounded, operation lost
- Airlines brand image
- Pandemic risk

## REGULATIONS

- WHO Recommendations
- IATA Publications
- Border Health Control Requirements
- Airport Requirements Compliant

## KEY BENEFITS USING BIO DECONTAMINATION SOLUTIONS PROVIDED BY UUDS

- Effective treatments
- Full guaranty on result – fleet under control
- Ground Time saving in case of infestation (means flight hours)
- ECO friendly process without risk for humans
- Sanitary Treatment SOFTWARE
- Tooling management, treatments Monitoring on WEB interface
- Treatments Optimization to keep fleet continuously under control
- Engineering Support for Sanitary Treatment
- International network
- Cost optimization

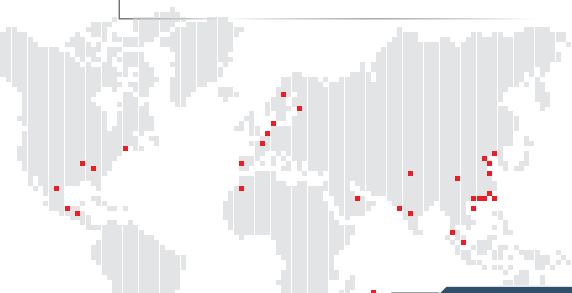

## EXPERT SERVICE GUARANTEED

### CUSTOMER EXPECTATION

- Service
- Commitment
- Guarantee
- Client satisfaction

### UUDS DELIVERABLES

- Intervention Engineering file
- Photo report if possible
- Dead animals
- Fumigation compliance certificate
